# Digital K12 School Mental Health Management Platform

Reporting | Behavioral Threat Assessment | Intervention

CrisisGo Safety Intervention Manager is an innovative solution that gives behavioral, discipline, and threat assessment teams the information and tools needed to assess, develop, and monitor risks in an individual's safety plan early, getting them the help they need for their specific case.

With our proactive approach for student and staff behavioral success, engage students, parents, staff, and the school community in risk discovery - from behavior and discipline issues to threats of violence against themselves or others.

INTEGRATION WITH SAFETY INTERVENTION MANAGER

Supported by all National Threat Assessment Models, Hybrid Models or District Developed Models. Integrated with school district directory services and student information systems to improve accuracy and ease of use. FERPA, HIPAA compliant.

REPORTING

To detect students' and staff needs early, CrisisGo Safety Intervention Manager provides multiple ways for students, parents, staff, and community to submit tip/bully reports, while seamlessly integrating with third-party systems, e.g. state tip line, and social media monitoring systems.

• Integrate with various monitoring systems.
• Real-time two-way communication with reporters, even when they remain anonymous.
• Instant, automatic report escalation.
• Flexible workflow customization.

THREAT ASSESSMENT

Empower the threat assessment teams with the information and tools needed to assess threats.

• Support various national assessment models, with flexible customization for meeting state compliance or school requirements.
• Easily assign tasks to threat assessment team, share evidence based information, and monitor progress of each task.
• Enable communication and further information collection from stakeholders.
• Record the whole assessment process and result.

BEHAVIOR ASSESSMENT

Empower the behavioral intervention team to initiate behavioral assessment models for bullying, familial issues, poor school performance, and more.

- Support various national assessment models, with flexible customization to meet state compliance or school requirements.
- Easily assign tasks to the assessment team, share evidence-based information, and monitor the progress of each task.
- Enable communication and further information collection from stakeholders.
- Record the whole assessment process and result.

INTERVENTION

Mitigate threats, develop interventions, and monitor student behavior in collaboration with the appropriate community mental health and support services.

- Define and launch individual safety and reintegration plans.
- With community-wide support, introduce a wide range of stakeholders in supporting students inside and outside of the school.
- Coordinate and notify each role to complete safety plan intervention based on their specific duty.
- Record the entire intervention process and results.

CASE MANAGEMENT

Digital system to help schools manage cases of multiple risk levels, including behavioral and disciplinary issues, and threats.

- Manage each case file with ease and access all related assessment and intervention records.
- Transfer case record across schools or school districts.

AWARENESS

Raise mental health awareness with students, staff, and the school community and engage in universal mental health screenings.

- Schedule consistent communications to address mental health issues during school terms and breaks.
- Identity risks with universal screening in our early warning system.
- Educate students, staff, and parents to report any potential threats.
- Survey students and staff to address the root cause of concerns.

RISK MANAGEMENT DASHBOARD

A comprehensive dashboard for district and school administrators to oversee all risks of responsible schools and actions to take. Leave no threat of case assessment unattended, no state compliance requirements unmet.

- School risk progress and trend.
- School tip/bully report and trend.
- School behavior threat assessment progress and trend.
- School mental health case progress and trend.

SAFE2SPEAKUP STUDENT APP

The Safe2SpeakUP app is the student companion to CrisisGo's safety app, allowing stuents to play their role in school safety. Often used as the first step in the "Early Warning and identification" process, students can:

- Report bully-related activity.
- Report threats and concerning behaviors.
- Disclose those at risk of suicide.
- Submit safety tips about incidents at schools.
- Access safety resources during an emergency event.

CRISISGO SAFETY INTERVENTION MANAGER BENEFITS

Report, assess, individualize safety and reintegration plans in one place.

Assessing, individualized safety and reintegration plans in a single place
