

Unified K12 School Safety Platform

Ultimate Solutions for Florida Schools to Address All Safety Requirements

CrisisGo Safety Platform has been dedicated in safeguarding schools since 2013, covering all phases of emergency management, from preparation, prevention, response to recovery. Trusted by over 16,000 schools and verified by FirstNet, our technology is committed to empowering everyone in each step of school safety.

With our advanced safety features, Florida schools can feel confident in their ability to achieve safety compliance and create a safe and secure learning environment for all.

ALYSSA'S ALERT

- **FirstNet Certified**

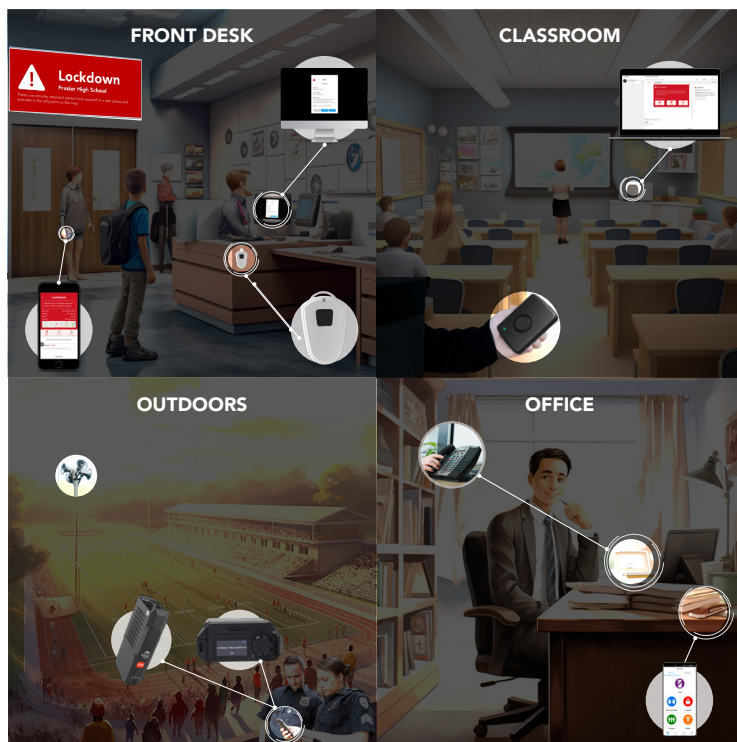

CrisisGo Panic app is certified by FirstNet (ios and android) and can be purchased using the ATT-ITN contract.

- **Trigger Through Multiple Devices**

Various silent panic buttons are available for different roles and occasions, including mobile/desktop apps, wearable buttons, mounted buttons, and security PTT handsets, enables campus staff and teachers to quickly initiate a silent alert in case of an emergency.

- **911 & First Responder Escalation**

Instantly escalate critical alert to 911 PSAPs and local first responders with access to situation progress and resources on the fly.

MASS NOTIFICATION

Flexible mass notification via multiple channels including app, SMS, email, PA, call, digital display, and more.

DRILL MANAGEMENT

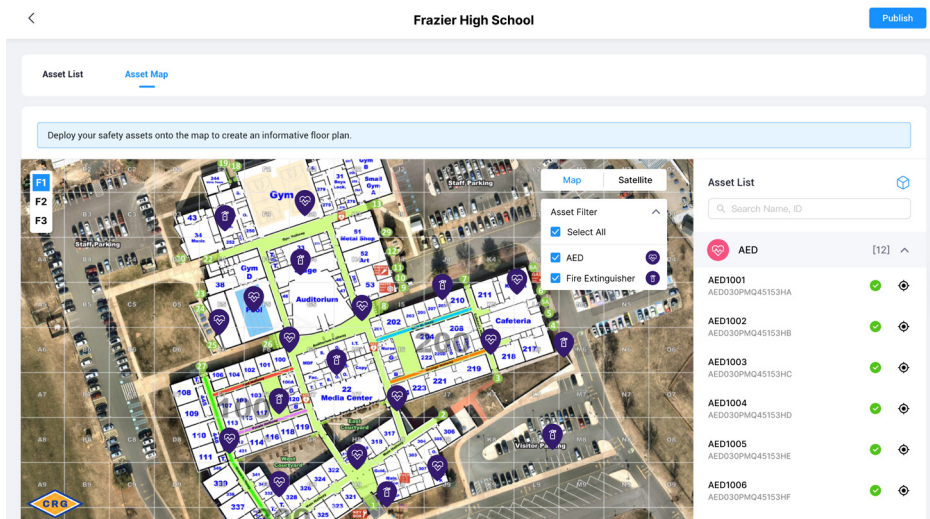

Efficiently schedule, conduct, and track safety drills to comply with state school drill requirements. Complete state required post drill reports in app following each drill to identify all state data collection requirements easily after the drill. Detailed reports and reminders reduce the district's risk of non-compliance.

CRITICAL RESPONSE MAPPING WITH SAFETY ASSET

Implement school digital floor plans in the CrisisGo system and deploy them with safety resources such as beacons, AED, door locks, cameras, and more. This will greatly improve the safety and well-being of the school community by providing instant access to accurate floorplans and expediting emergency response efforts.

View and interact with maps and receive live updates through CrisisGo's app and webapps.

In addition to making these maps and apps available to authorized school personnel, schools will also have the option to share the maps with local public safety and emergency management agencies, such as 9-1-1 Public Safety Answering Points, fire departments, police departments and sheriff's offices. The sharing of this crucial mapping data will aid in improving emergency response to every 9-1-1 calls and emergency originating from school properties.

PEOPLE SAFETY & FAMILY REUNIFICATION

With 2-way communication, connect all staff, track all students' and staff's safety status, and reunify students with parents with maximized efficiency.

Fully align with the State of Florida Reunification Standard or the "I Love U Guys" Foundations Standard Reunification, CrisisGo Reunification provides unparalleled reliability with the most streamlined and innovative safety system to connect students, schools, parents, and first responders to ensure efficiency and collaboration in the reunification process.

Using the Reunification Dashboard, oversee the reunification event process and guide your team with realtime data or communicate with parents to provide support when needed. Easily coordinate with community partners through sharing authorization to guarantee a safe, smooth reunification.

TIP & THREAT REPORTING

- Convenient to Report**
 Enable students, staff, parents, and community members to report tips locally for those that want a local option, including bully, threats, and other safety concerns. Supports anonymous reporting in whichever way including: Safe2SpeakUp Student App, Email, SMS and Webpage.
- Easily Manage Compliance**
 Local school officials can assess risk reports and forward them to the appropriate behavior or threat assessment team for follow-up. School tip receivers can request additional information from a reporter using 2-way communication, even with anonymous reporters.
- Assist SESIR Incident Reporting**
 Aggregated incidents data is provided to assist school districts to report accurate information for School Environmental Safety Incident Reporting, fulfilling DOE Information Database reporting requirements.

SAFETY INTERVENTION MANAGER

With Safety Intervention Manager, digitalize case management and comply with Florida State Required Threat Management model. Easily monitor Student Support Management Plan interventions and streamline school-based threat management teams case documentation.

EMERGENCY COMMAND CENTER & RESPONSE

With smart emergency operation center, keep first responders and district admins updated on school emergency progress and building floor plans, coordinate response, and evacuate all staff with seamless efficiency.

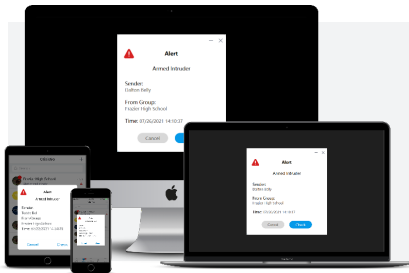

By implementing indoor location services, it also has the capability to show, in near real time, where emergency alerts are coming from, such as the specific room where an individual is sent an alert from.

SCHOOL RISK RESPONSE DASHBOARD

Imagine principals and superintendents being able to identify safety responsibilities easily. With the School Risk Response Dashboard, it's as simple as a glance. Every safety item, every detail - all neatly organized and accessible, tailored to the principal's role and responsibilities. Addressing a risk is now just one click away. Easily navigate from an identified risk to the precise details that need immediate attention. The dashboard streamlines the response process, allowing principals to take swift action without unnecessary complications.
